

Senior Software Engineer

MagTek's vision is to bank, shop, work, play, communicate and exchange services in a safe and worry-free environment.

Our mission is to deliver MagneSafe™ secured devices and services across the globe to governments, financial institutions, merchants, and parties committed to safer transactions. Our fraud fighting solutions are simple, practical, scalable and cost effective. We strive to protect the identity, privacy, assets, and safety of our customers and their customers.

To help us continue to lead our industry, MagTek is seeking a dynamic, self motivated and creative individual for the position of senior Software Engineer with experience developing and maintaining "Web Based" Software products for Windows Operating system. Strong knowledge of .NET Framework (General .NET Plus (ADO.NET, ASP.NET), AJAX, SQL Server, SQL Scripts, IIS Maintenance and Configuration, JavaScript, and XML is required. Knowledge of ActiveX Components and COM Objects is preferred. Experience on developing and maintaining Software products for Mac Operating system is preferred.

Location - Seal Beach, CA

Responsibilities and Duties:

- Responsible for processing and performing all jobs in an efficient manner with limited assistance from the supervisor.
- Design and develop programming systems making specific determinations about system performance. Responding promptly and professionally to bug reports.
- Expected to conduct system analysis and development, with limited support from professional staff, to keep our systems current with changing technologies.
- Analyze and design the development of software systems to form a basis for the solution of information processing problems.
- Analyze system specifications and translate system requirements to task specifications for junior programmers.
- Responsible for analysis of current programs including performance, diagnosis and trouble-shooting of problem programs, and designing solutions to problematic programming.
- Responsible for developing new programs and proofing the program to develop needed changes to assure production of a quality product.
- Tests new programs to ensure that logic and syntax are correct, and that program results are accurate; assists lower-level programmers with programming assignments.
- Document code consistently throughout the development process by listing a description of the program, special instructions, and any changes made in database tables on procedural, modular and database level.
- Full life cycle application development.

Job Requirements:

- BSCS with 10 plus years of experience required.
