MagTek's IntelliCAT System Now Offers Interoperability with Harland Financial Solutions' Ultradata Software

The IntelliCAT System readily interfaces to Ultradata Software, a data processing system widely used at many Credit Unions throughout the U.S.

Seal Beach, CA - March 24, 2008

MagTek, Inc., a global leader in electronic payments technology, announced today that MagTek's IntelliCAT, a state of the art card issuance and PIN selection system, now offers interoperability with Harland Financial Solutions' Ultradata processing software widely used by many Credit Unions throughout the United States.

MagTek's IntelliCAT System allows Credit Unions to offer enhanced services for their various card products such as instant issuance and secure PIN selection for Debit, Credit, ATM and Gift cards. With IntelliCAT, members can now change their PIN on an existing card, or select their PIN when opening a new account or ordering a new MasterCard or VISA Debit card. Members appreciate the option to instantly receive their permanent card at the same time they open their account, in contrast to the traditional wait of 7-10 days to receive their card in the mail.

IntelliCAT communicates with Ultradata Software utilizing the OpenPath interface feature, and both systems can now exchange all of the information needed to produce the card automatically, accurately and instantly.

"IntelliCAT offers accuracy, speed and security, allowing the Credit Union to comply with the security requirements published by MasterCard and VISA for Instant Card Issuance," said Andy Deignan, VP Business Unit Manager for Financial Products. "Additionally, MagTek's IntelliCAT system offers the Credit Union very unique features such as Secure Remote PIN selection for members that are out of state and unable to come to a branch to select their PIN," added Mr. Deignan.

MagTek also offers the ExpressCard 1000, a single device delivering instant card issuance and enhanced card personalization. The ExpressCard 1000 provides full image support, magstripe and smartcard encoding, embossing, plus wear-resistant color tipping and indent

printing to create durable and stunning personalized cards that will excite existing members, attract new members and increase revenues by expanding the member base.

By interfacing to Ultradata software, MagTek's IntelliCAT system delivers an ideal solution to make card issuing and all related support activities fast, easy and secure.

About MagTek

Since 1972, MagTek has been a leading manufacturer of electronic devices and systems for the reliable issuance, reading, transmission and security of cards, checks, PINs and other identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Its products include secure card readers, check scanners, PIN Pads and distributed credential issuing systems. These products are used worldwide by financial institutions, retailers, hotels, law enforcement agencies and other organizations to provide secure and efficient electronic payment and identification transactions.

Today, MagTek continues to innovate with the development of a new generation of security centric products secured by MagneSafe™. By leveraging strong encryption, secure tokenization and real time authentication, MagneSafe products enable users to assess and validate the trustworthiness of credentials used for online identification, payment processing, and other high-value electronic transactions.

MagTek is based in Seal Beach, California and has sales offices throughout the United States, Europe, and Asia, with independent distributors in over 40 countries. For more information, please visit www.magtek.com.
