

## Quick Installation Guide

### Setup and Installation

#### Overview

- PCI 2.x Compliant
- Triple DES, DUKPT
- MagnePrint® Card Authentication
- Mutual Authentication (Device & Host)
- USB HID Device, BUS Powered
- Backlit LCD Graphics

Plug the connector of the IPAD SC's USB cable into a USB port on your PC (see figure below). The Windows PC will automatically detect the IPAD SC.

#### Major Components

#### NOTE:

The IPAD SC is a USB powered device and an external power supply is not required. Check with your PC software or payment application provider for specific IPAD SC user functionality.

#### Please note

Subjecting the unit to temperature extremes (above 60°C or below -10°C) can adversely affect the unit's battery life and tamper security switches, which can render the unit inoperable and void the warranty.

#### How to connect

IPAD SC with USB Cable

Privacy Shield (optional)

#### Legal Terms and Conditions

PCI SSC's approval applies only to PEDs that are identical to the PED tested by a PCI Security Standards Council recognized laboratory. If any aspect of the PED is different from that which was tested by the laboratory—even if the PED conforms to the basic product description contained in the letter—then the PED model should not be considered approved, nor promoted as approved. For example, if a PED contains firmware, software, or physical construction that has the same name or model number as those tested by the laboratory, but in fact is not identical to those PED samples tested by the laboratory, then the PED should not be considered or promoted as approved.

No vendor or third party may refer to a PED as "PCI Approved," nor otherwise state or imply that PCI SSC has, in whole or part, approved any aspect of a vendor or its PEDs, except to the extent and subject to the terms and restrictions expressly set forth in a written agreement with PCI SSC, or in an approval letter. All other references to PCI SSC's approval are strictly and actively prohibited by PCI SSC.

When granted, an approval is provided by PCI SSC to ensure certain security and operational characteristics important to the achievement of PCI SSC's goals, but the approval does not under any circumstances include any endorsement or warranty regarding the functionality, quality, or performance of any particular product or service. PCI SSC does not warrant any products or services provided by third parties. Approval does not, under any circumstances, include or imply any product warranties from PCI SSC, including, without limitation, any implied warranties of merchantability, fitness for purpose or non-infringement, all of which are expressly disclaimed by PCI SSC. All rights and remedies regarding products and services, which have received an approval, shall be provided by the third party providing such products or services, and not by PCI SSC or the payment brand participants.
