- iDynamo 5 (Gen I, II, III)
- tDynamo (Gen I, II)
- iDynamo 6 (USB, Lightning)
- DynaFlex II Go
- DynaProx (coming soon)

WHAT SETS OTTERBOX APART

Ask us about their uniVERSE Series and other rugged enclosures.

Make Accepting Mobile Payments More Rugged and Secure than Ever.

In partnership with OtterBox®, a privately-owned consumer electronics accessory company that produces water-resistant, shock-resistant, and drop-resistant cases for mobile devices, MagTek has engineered uniVERSE adapter clips. The MagTek uniVERSE adapter is made to take advantage of OtterBox uniVERSE Series cases, making it easier to have swappable modules for all of your payment needs.

MOBILE ENVIRONMENTS

Bring your point-of-sale wherever you need to go, MagTek secure card reader authenticators deliver mobility. A perfect solution for deliveries, curbside pickup, pay-at-the-table, in-flight airline payments, and more.

SIMPLE AND SECURE

Adapters securely attach to the secure card reader authenticator then slide into place on any OtterBox case with the uniVERSE clip.

FLEXIBILITY

uniVERSE adapter accessories make it easier for merchants to swap between different tablets and smart devices for everything from delivery to mobile, mounted, or unattended solutions.

PAYMENT ACCEPTANCE

The wide array of MagTek products delivers a form factor for digital payments including NFC mobile wallets, EMV Contactless, EMV Contact Chip, Magstripe, Apple® Pay, Samsung® Pay, Google Pay™, PayPal and Venmo.

MagneSafe Devices

EXISTING L3 OR MAGENSA GATEWAY SERVICES REQUIRED

These devices offer the form factor and mobility that many of our partners are looking for. They require an existing L3 or are active Magensa Services customers.

Dyna Devices - Uncommon Products with a Common SDK

Dyna products bring a new level of security to your point-of-sale platform with dynamic authentication, encryption, and tokenization. Using AES 128/256 or Triple DEA encryption and DUKPT key management, transactions are more secure. MagTek Dyna products (DynaFlex II PED, DynaFlex II SCR, DynaFlex II Go, and DynaProx) use a common kernel and SDK giving developers the flexibility to integrate different hardware into their complete solution.
