PARTNERSHIPS MATTER
Bring payment and access solutions more places with RAM Mounts IntelliSkin® Thin-Case™ with a GDS® Kiosk Dock

WORKS WITH
MagTek
• DynaFlex II Go

WHAT SETS RAM MOUNTS APART
• Flexibility to go from mobile to securely docked in seconds

MOBILE TO DOCKING SOLUTION

RAM® Mounts, a leading manufacturer of rugged mounting and docking solutions, is proud to announce a new partnership with MagTek, a global leader in secure payment technology and security solutions. This collaboration introduces integrated payment-ready docking solutions designed specifically for tablets in retail environments, combining IntelliSkin® Thin-Case™ with MagTek DynaFlex II Go.

Android and iOS Host Devices

Currently built for Samsung Tab A11+ and iPad 10th and 11th generation devices, the new Thin-Case™ design features an integrated payment module holder engineered to securely house the MagTek DynaFlex II Go. Pairing the MagTek compatible IntelliSkin® Thin-Case™ with a GDS® Kiosk Dock creates a unified mobile point-of-sale system that enhances both customer experience and employee efficiency.

Made for Retailers

Combining RAM® Mounts' GDS® ecosystem with MagTek's secure card reader technology lets retailers transform tablets into fully mobile POS systems. Store associates can assist customers anywhere on the floor, reducing checkout lines, improving engagement, and increasing overall transaction speed.

Minimize Cable Clutter

The integrated design also minimizes cable clutter and simplifies device management. With secure docking, consistent charging, and reliable mounting, retailers can deploy scalable solutions across multiple locations while maintaining a standardized setup.

Payment & Access Peripheral

MagTek's DynaFlex II Go brings industry-leading security and flexibility to mobile payments, supporting a wide range of transaction types (tap, dip, swipe, and read bar codes) while ensuring compliance with the latest security standards. Paired with IntelliSkin® Thin-Case™, retailers gain a durable, purpose-built solution that stands up to high-traffic environments. Built for mobility and versatility, this enables pay-at-the-table, curbside, delivery, line-busting, and any other type of mobile payment.
