

A screenshot of the QwickSign web interface. At the top, the QwickSign logo is visible. Below it is a progress bar with four steps: 'Welcome', 'Agree to Terms', 'Sign', and 'Done'. The 'Agree to Terms' step is currently active, indicated by a red circle and a checkmark. Below the progress bar, there is a text area with the following content: 'Review the terms and conditions below and check the checkbox indicating your agreement to receive and sign this document electronically. Click Start Signing when you are ready to sign.' Below this text is a checkbox with the text 'I have read and agree to the terms and conditions'. The checkbox is checked, and there is a small icon of a document with a checkmark next to it.

## eSignature with Payments

### Magensa QwickSign Solution

MagTek brings payments and agreements together in a single process where an application, contract, quote, or invoice needs to be signed and a payment is collected.

#### Magensa QwickSign Secure Digital Environment

Magensa QwickSign is a complete e-signature solution for moving manual ink and paper processes including contracts, quotes, proposals, and release of liability to a secure digital environment. QwickSign enables you to fully automate your business transactions by coupling document signature and payment in one smooth transaction.

#### Forensically identifiable evidence

QwickSign builds from our forty-plus years of providing secure payment solutions across many industries. QwickSign facilitates the managed processing of documents in an all-digital, high-security environment. This patented electronic signature software provides forensically identifiable evidence of contractual acceptance with digitized electronic signatures. Signatories can e-Sign by either hand-signing or typing their signature, and documents can be stored and/or transmitted electronically. QwickSign is used to quickly obtain biometric or certified electronic signature authorization of documents by one or more signatories located anywhere in the world.

Call a representative to learn more: 562-546-6400.

## Increase efficiency

Reduce the signature barrier. Reduce delays. Digital transactions happen faster: with a click of a button, even while still on the phone; or in person electronically; and immediately send a copy to your client and secure storage for you. Immediate document creation and distribution means you get documents signed in minutes, not hours or days.

## Increase accuracy

Increased accuracy reduces 'not in good order' documents. Required work flow rules can ensure 100% completion. Audit trail for the entire transaction is generated and saved with the document.

Operating System	
Desktop OS	Windows 7+ Mac OS X Linux
UPC Browser	IE9+* Edge Chrome 36+ Firefox 36+ Safari 7+
Mobile Device	Android 4.4.2+ iOS 7+ Windows Phone 8.1+ Windows 8+ (Surface, Tablet, etc.)
Mobile Browser	IE Mobile Chrome Mobile 36+ Android Stock Browser (Android 4.4+ enabling TLS 1.2, Android 5 it is enabled by default) Safari Mobile (iOS 7+)

## QwickSign implementation is easy and flexible

QwickSign implementation is easy and flexible, whether you use it as a cloud service or deployed on premise. Sign up for the number of user licenses that will be completing mobile signings with clients face to face or sending documents by email for signature. License fees are billed per user or per transaction based on the feature level. Documents can be uploaded into QwickSign application or custom integrations are available through our APIs.

### Document Features

- Templates - Save time by creating and storing templates for documents used most often.
- Multiple Documents - Signers can sign and send multiple documents in a signing session within an envelope package.
- Advanced Search - Use this advanced search feature to quickly find any document.
- Reports & Audit Trails - Know the exact status of your document at any time using advance tracking capabilities to ensure 100% completion rates.
- Desktop App - Easily open and send word documents, PDFs and other types of forms for signatures.

### Signature Features

- Certified - Enforce security with an "Electronically Signed" statement including printed "meta-data" of a date/time stamp, an IP address stamp and an internal ID.
- Multiple Signers - Allows for multiple signers for a single document.
- Trigger App - Enjoy the lightweight companion app to generate and sign documents directly on a mobile device, or sent via email.

### Support

- Email Support & Knowledge Base - Gain access to our Knowledge Base for helpful training videos and documents, or "Submit a Request."
- Branding - Customize the way the signing process looks for your customers by branding it with your company's corporate colors, logo and theme.
