## 1 Introduction

The Reseller Portal application is used to access existing merchant information, onboard merchants, update merchant details, view transaction details, and custom reporting.

The Reseller Portal is organized as follows:

1. Service Dashboard
2. Accounts
3. Reports

The Reseller Portal application features are explained in detail below. Only Resellers are authorized users of the Reseller Portal application. Each Reseller can manage their own merchants. Resellers can view only their specific merchant transactions and reports.

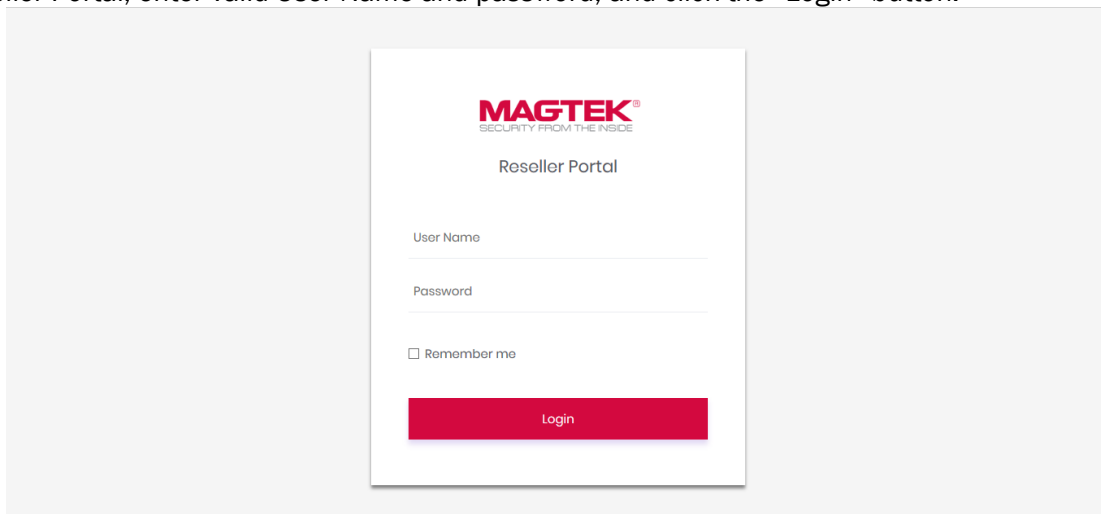

## 2 Service Dashboard

The Reseller logs into the application and selects the desired service (MPPG, QwickSign, etc.). Once the Reseller selects a service, the service dashboard is presented.

In the dashboard, the Reseller can view a Transaction Type Summary, Active/Inactive Merchants Information, and the Top 5 Merchant's information.

### 2.1 Step One - Login

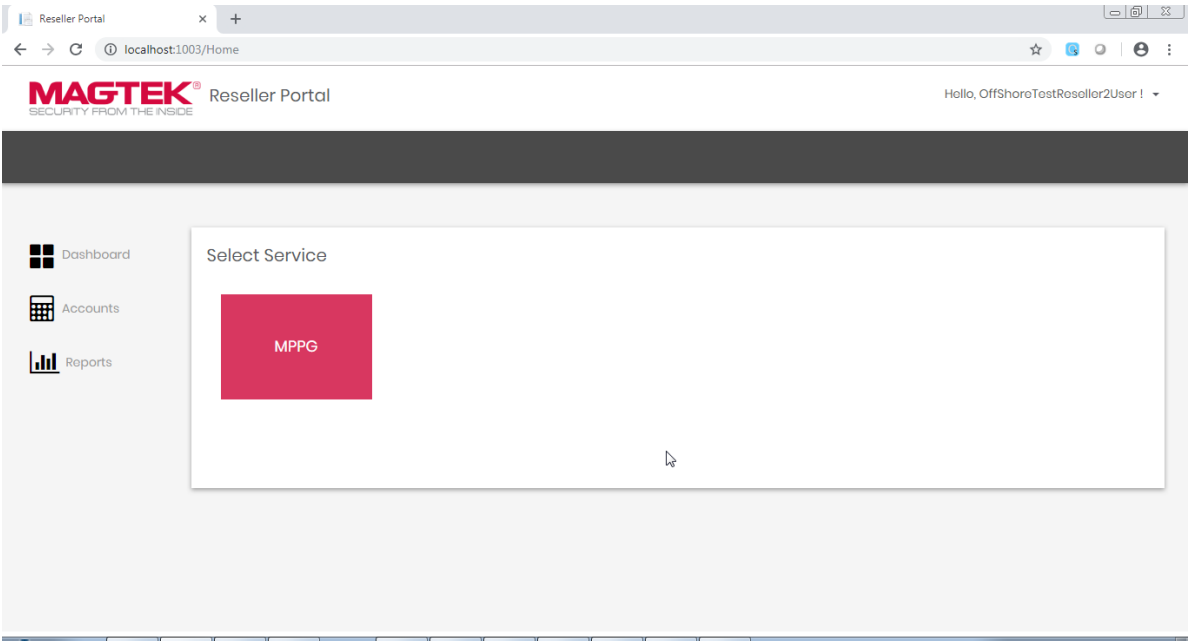

Open the Reseller Portal, enter valid User Name and password, and click the "Login" button.

The image shows a login form for the Magtek Reseller Portal. At the top, the Magtek logo is displayed with the tagline "SECURITY FROM THE INSIDE". Below the logo, the text "Reseller Portal" is centered. The form contains two input fields: "User Name" and "Password". Below these fields is a checkbox labeled "Remember me". At the bottom of the form is a red button with the text "Login". The entire form is set against a light gray background.

Once the Reseller has logged into the application, the Reseller will be automatically directed to the "Select Service" page.

### 2.2 Step Two - Select Service

The menu options on the left-hand side of the page will be enabled only after selecting a service.

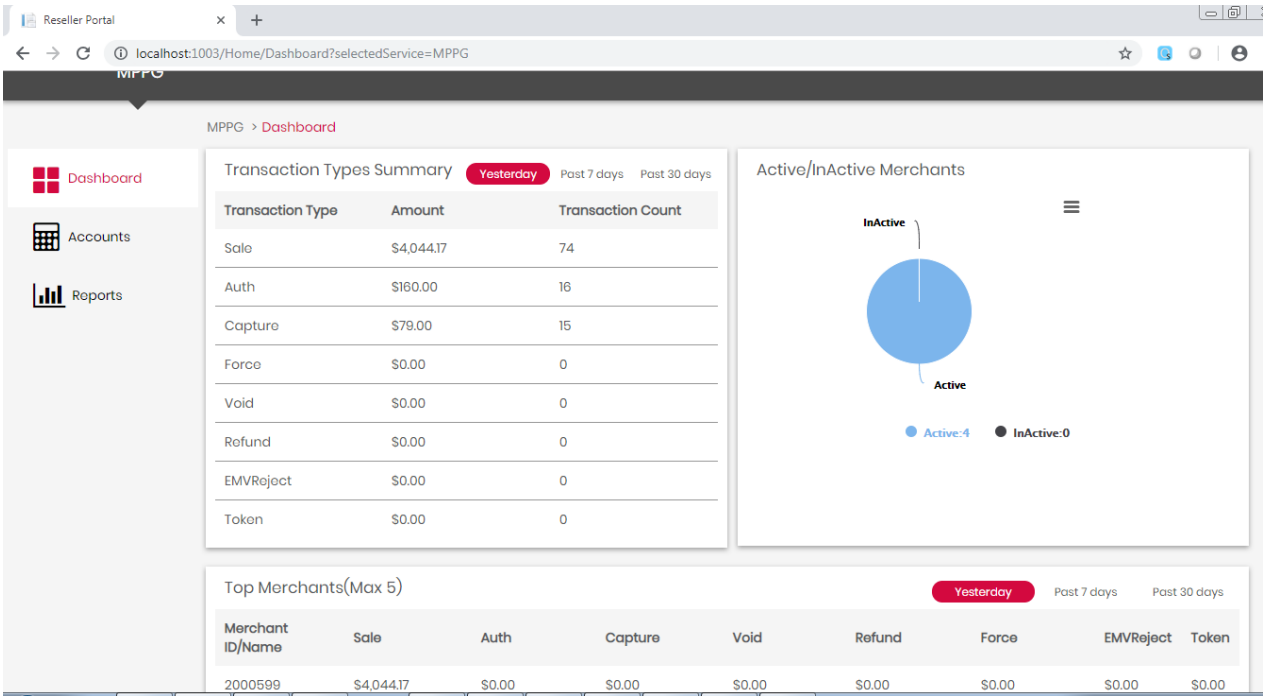

After selecting a service (“MPPG” in this case), the Reseller will see the Dashboard page of the selected service.

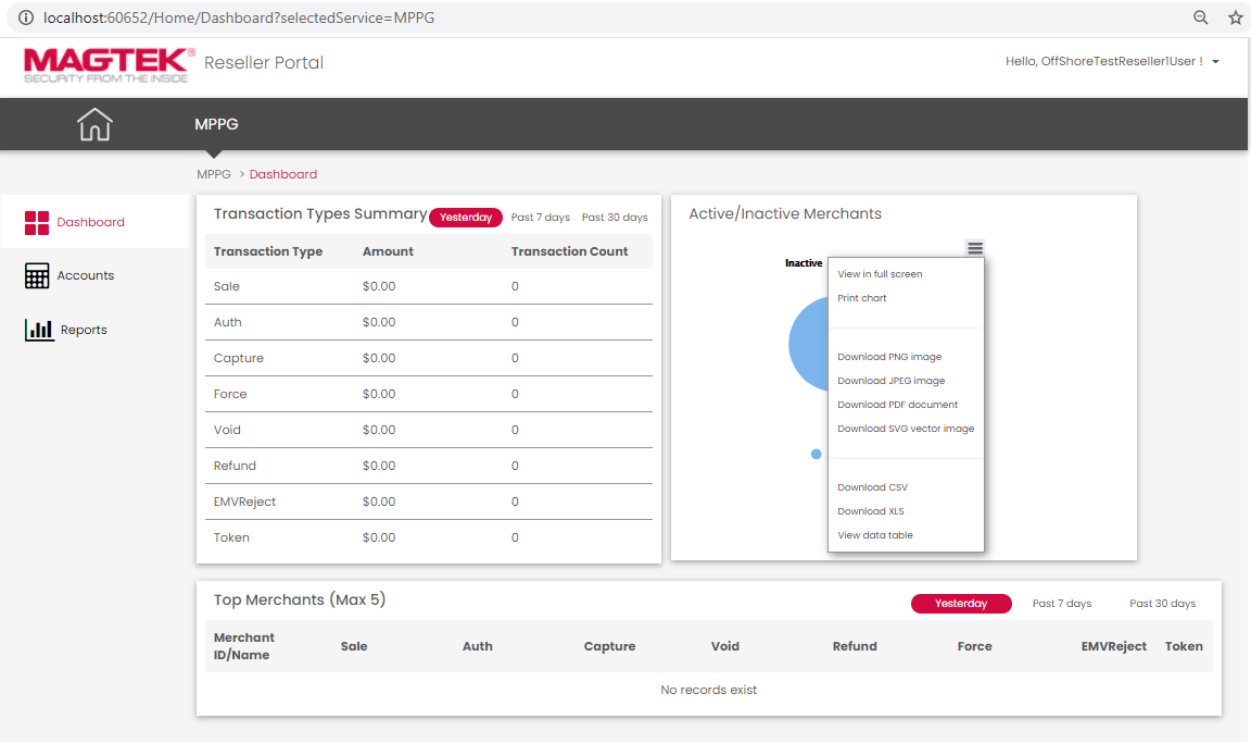

The Reseller Portal works with MPPG v2 and above.

2.3 Step Three – Select Dashboard

The Dashboard has three sections:

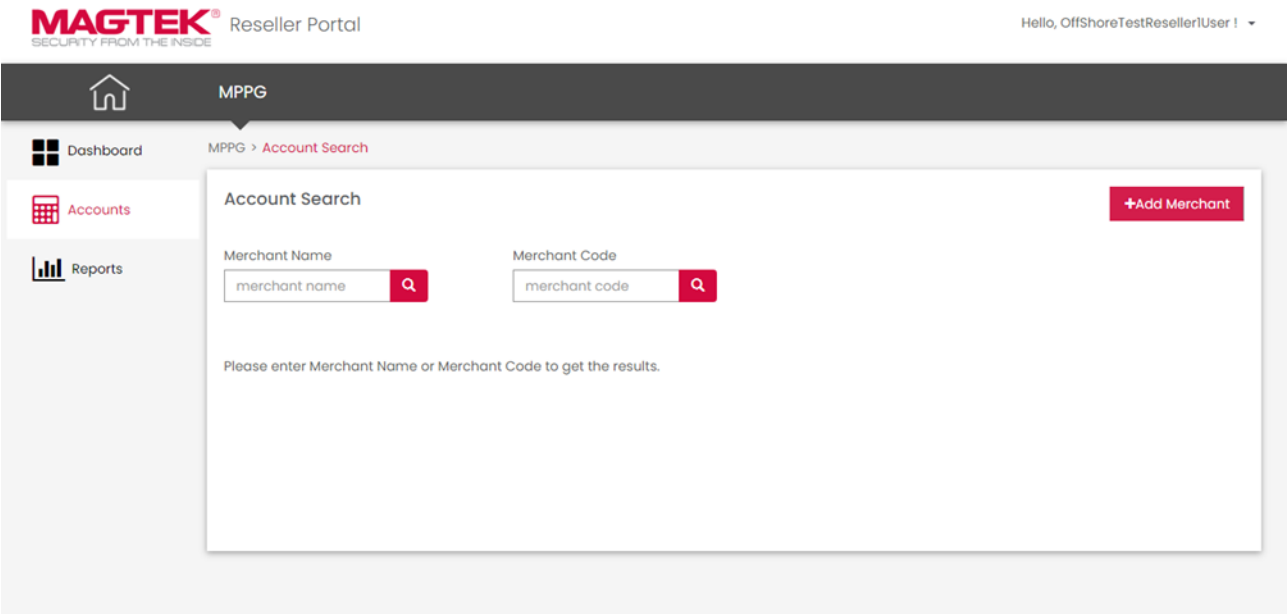

- 1. Transaction Type Summary
- 2. Active/Inactive Merchants
- 3. Top 5 Merchants

### 3 Accounts Details

By clicking the “Accounts” option on the left menu, the Reseller is presented with the account search page to search for accounts and view details or transaction details from search results, view /customize reports of a specific Merchant, and onboard a new Merchant.

#### 3.1 Onboard Merchant

To onboard a Merchant, navigate to the Account search page where an Add Merchant link will be available in the upper-right corner. Clicking on the link will navigate to a new Merchant onboard page.

Before entering the details of a new Merchant, the Reseller will have options for selecting the User Name and must select the target processor. The button below the User Name input field toggles between [Generate UserName] and [Input UserName].

### 3.1.1 User Name of choice

Reseller can opt for a User Name of their choice (up to 37 characters – any combination of numbers and letters (not case sensitive) and no special characters) by entering a value in the textbox. “MAG” will automatically be appended on the front-end of the custom character string to make to create the complete User Name.

#### User Name\*

Generate UserName

### 3.1.2 Reseller can opt for a User Name to auto generate.

Simply click the [Generate UserName] button to toggle to that option. User Name will automatically be generated now and the Reseller can move to processor selection

#### User Name\*

Input UserName

### 3.1.3 Associate Onboarding Merchant with TokenExchange Connect Public Credential

If a Reseller has integrated Magensa TokenExchange Connect (client-side JavaScript for integrated manual entry or ecommerce), they can enable it during the Merchant boarding process, The radio button will be defaulted to “Yes” when a logged in Reseller has TokenExchange Connect already setup. The radio button will be defaulted to “No” and disabled when a Reseller does not have TokenExchange Connect set-up.

A message will display, as **“You are not currently setup for TokenExchange Connect”**, when the Reseller logged in has no TokenExchange Connect.

When Adding or Editing Merchants, TokenExchange Connect boarding will be based on the following conditions:

- Merchants will be enabled with TokenExchange Connect when **“Yes”** is selected during Adding or Editing a Merchant.
- Merchant will not be enabled with TokenExchange Connect when **“No”** is selected

User Name\*

Generate UserName

TokenExchange Connect Production

☒ Yes
 ☐ No

Processors\*

--Select--

User Name\*

Generate UserName

TokenExchange Connect Production

☐ Yes
 ☒ No

You are not currently setup for TokenExchange Connect

Processors\*

--Select--

Radio buttons disabled and a message will display when Reseller logged in has no TokenExchange Connect

3.1.4 Processor Selection:

Allows Reseller to select a processor and enter processor details.

Processors\*

--Select--

--Select--

Jet Pay

Rapid Connect

PayFlow

USDC-1

Based on the selected Processor, a specific set of input fields will display. Reseller will enter data for the input fields based on corresponding information obtained from a Merchant VAR sheet supplied by the Processor.

Profile Component Details

IndustryInfoType*	Password	TerminalID*
<input type="text"/>	<input type="text"/>	<input type="text"/>

3.1.5 Merchant Information Capture

Reseller enters required basic account details for the merchant profile.

Merchant Account Information

Company Name*	Address1*
<input type="text"/>	<input type="text"/>
Address2	City*
<input type="text"/>	<input type="text"/>
State*	ZipCode*
Alabama	<input type="text"/>
Primary Contact*	Phone*
<input type="text"/>	<input type="text"/>
Email*	
<input type="text"/>	

3.1.6 Email Notifications

Email address (es) and subject are required fields for sending the merchant credentials and set password link to the merchant to complete their account set-up. If the reseller wants to send this notification to multiple emails, they can by separating email addresses with commas. Notes can be included in the notification email.

When all required information is successfully entered, Reseller selects Add Merchant in the lower-left corner of the following page below. A new Merchant account creation email will be triggered and sent to the Merchant to complete account activation.

If for some reason an error occurs when adding a new Merchant account, Reseller can edit the Merchant account and/or update Processor details as described in Section 3.3. In addition, Reseller can send a password Reset link to the Merchant Email.

### 3.2 Accounts Search

By selecting the “Accounts” option from the left menu, the Reseller will navigate to Account Search page as below. The Reseller can also perform a search by either Merchant Name or Merchant Code.

After entering the search criteria, the results will appear as below:

### 3.3 Account Details

By selecting any of the Merchant names from the results list, an “Account Details” page will be presented.

The screenshot shows the MAGTEK Reseller Portal interface. The top navigation bar includes the MAGTEK logo, the text "Reseller Portal", and a user greeting "Hello, Offshoretestreselleruser!". The main content area is titled "MPPG" and shows a breadcrumb trail: "MPPG > Accounts > CMPTest (Merchant ID - 2005673) > Details". The left sidebar contains links for "Dashboard", "Accounts", and "Reports". The main content area displays the "Details" tab for the merchant account "CMPTest".

**Edit** **Back**

By clicking the “Back” button, the Reseller will be returned to the previous Account Search page to Select/Search for other Accounts.

The Reseller can edit the details by clicking the “Edit” button at the bottom-left of this page.

Reseller can do the following actions via the Edit Merchant Screen

1. Update Processor profile details
2. Send a Password Reset link to Merchant
3. Activate/Deactivate a User.
4. Unblock a User
5. Associate **TokenExchange Connect** to Merchant

## 4 Reports

To view all the Merchants information, the Reseller can click on “Reports” from the left navigation menu.

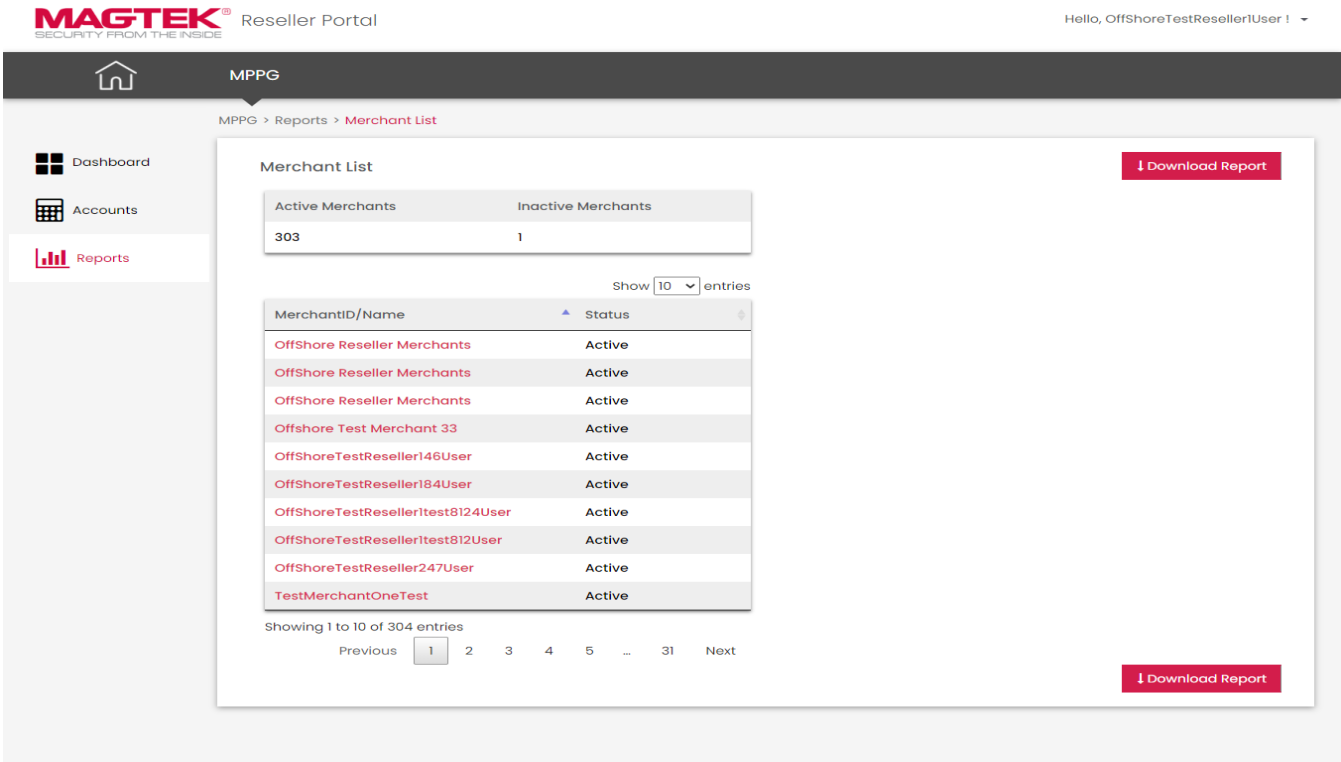

The Reseller is presented two options:

- 1. Merchant List
- 2. Merchant Sales by Date

### 4.1 Reports: Merchant List

The Merchant List Report provides information related to the total number of Active, Inactive Merchants, and their details. The Reseller can download the Merchant information with the “Download Report” button.

## 4.2 Reports: Merchant Sales by Date

The Merchant Sales by Date Report gets the transaction type related information based on a chosen date range (Yesterday, Past 7 days, Past 30 days, Custom). By selecting, the Custom option from the date range drop down, “From Date” and “To Date” criteria will be displayed. This date range cannot exceed 120 days.
