

MAGTEK[®]
SECURITY FROM THE INSIDE

Vision: To bank,
shop, work, play,
communicate and
exchange services in
a safe and worry-free
environment.

MagTek, Inc.

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission and security of cards, checks, PINs and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Its products include secure card reader/authenticators, encrypting check scanners, PIN pads and distributed credential personalization systems. These products are used worldwide by financial institutions, retailers, and processors to provide secure and efficient payment and identification transactions.

Today, MagTek continues to innovate. Its MagneSafe™ hardware architecture leverages strong encryption, secure tokenization, dynamic card authentication, and device/host validation enabling users to assess the trustworthiness of credentials and terminals used for online identification, payment processing, and high-value electronic transactions.

MAGTEK'S UNIQUE SELLING POINT

The exclusive feature that sets MagTek apart is our MagneSafe™ Security Architecture.

MagneSafe is a digital identification and authentication architecture that safeguards consumers and their personal data. Designed to exceed PCI regulations, MagneSafe leverages strong encryption, secure tokenization, counterfeit detection, tamper recognition, data relevance and integrity, and dynamic digital transaction signatures, which together validate and protect the entire transaction and each of its components.

A key feature of MagneSafe is MagnePrint® card authentication, a patented, proven technology which reliably identifies counterfeit credit cards, debit cards, gift cards, ATM cards and ID cards at the point of swipe, before fraud occurs. MagneSafe's multi-layer security provides unmatched protection and flexibility for safer online transactions. MagnePrint is a dynamic card authentication technology based on the unique physical properties of the magnetic stripe, also referred to as the stripe's digital identifier (DI). It provides validation that the card itself is genuine and that its encoded data has not been altered.

1970s

Innovation

First motorized, hand-swipe, customer-PIN, AirPhone

Insertion Reader
Industry's first ATM motorized card reader developed

1972

Swipe Reader
Industry's first hand-swipe card reader developed

1974

MCAT®
Designs the first encoder for customer-selected PINs

1978

1980s

AirPhones
MagTek technology brings the first public telephones to aircrafts

Interface Readers
Direct connection to PCs and cash registers

1990s

Speed

90s MICR with MSR, SmartCard, PIN and Quality Monitoring

MICR/MSR readers
MagTek delivers its innovative MICR / MSR check readers

InSpec 9000
Card encoding quality tester

IntelliStripe
Breakthrough hybrid Smart Card magstripe readers

IntelliPIN®
Encrypting PIN pads greatly improve security and efficiency at the teller window and for magnetic stripe card transactions in PC-based POS environments

2000s

Reliability

Advanced technology, focused on reliability

IntelliCAT®
Introduces Windows®-based System for instant card issuance and consumer selected PIN's

IntelliStripe® 380
The industry's most precise motorized magnetic stripe and smart card reader/encoder

IntelliHead
A magnetic head with integrated ASIC. The ultimate card reader

MICRImage™
A compact MICR reader and check scanner with a modern ergonomic design that offers deliberate function and ease of use

Delta ASIC
MagTek develops the first compact triple-track ASIC with on-chip data buffering. No external components required

2000s

Security

New era of security with MagnePrint and MagneSafe

Magensa™
PCI certified, fraud prevention, detection and alerting service

MagnePrint®
A revolutionary magnetic stripe card security technology that can detect skimmed or magnetically altered counterfeit cards

MagneSafe™ IntelliHead
Industry's First Secure Card Reader Authenticator (SCRA) with Counterfeit Resistant Security Module (CRSM)

MagneSafe™ Security Architecture (MSA)
A digital identification and authentication architecture that safeguards consumers and personal data

Excella™
New era of check scanning technology, meets requirements of Check 21

ImageSafe
A compact check reader and dual-sided scanner with its integrated SCRA

Excella MDX
Secure, low cost, compact check reader and dual-sided scanner

MICRSafe
A single-feed MICR reader with its integrated SCRA

Secure Card Readers, PIN PEDs and Card Personalization

Mobility

2010s

uDynamo
SCRA headphone or USB interface

iDynamo 5
SCRA for Apple's Lightning iOS devices

BulleT
SCRA with USB or Bluetooth wireless interface

Flash
SCRA with memory and USB connection

Dynamag
SCRA with USB

DynaMAX
SCRA with USB and BLE

eDynamo
SCRA and EMV, USB and BLE

oDynamo
OEM insert SCRA

IPAD®
A PCI PTS 2.x compliant Encrypting PIN pad and SCRA

DynaPro
A PCI PTS 3.x SRED compliant Encrypting PIN pad with SCRA and Contact/Contactless Smart Card reader

DynaPro Mini
A PCI PTS 3.x SRED compliant Encrypting PIN pad with SCRA and Contact Smart Card reading

QwickCards
A cloud-based service for the issuance of ATM, debit, credit, gift, loyalty and ID cards

ExpressCard 1000
Secure, multi-function card personalization device

ExpressCard 2000
Secure, multi-function card personalization device with seven card hoppers

tDynamo
Mobile to countertop, MSR, EMV and NFC

cDynamo
iOS for multi-media ready apps for magstripe

kDynamo
iOS for multi-media ready apps MSR, EMV & NFC

DynaPro Go
A PCI PTS Mobile PIN PED with EMV and NFC

Magensa Security Services and Customer Experience

Services

today

Transaction Security and Data Protection
Dynamic Encryption, Tokenization and Authentication

Gateway Services
Decrypt&forward, Magensa Payment Protection Gateway

Software and Applications
QwickPAY, QwickSign, Multi-Factor Authentication, IAM

Development Tools and Resources
Remote Device Management, SDKs, APIs, and MagneFlex Browser and middleware

MISSION

We deliver MagneSafe™ secured devices and services across the globe to governments, financial institutions, merchants, and parties committed to safer transactions. Our fraud fighting solutions are simple, practical, scalable and cost effective. We strive to protect the identity, privacy, assets, and safety of our customers and their customers.

- MagTek is the most experienced and innovative provider of secure transaction technology to the payment card industry.
- MagTek provides PCI-compliant products that process, encrypt, tokenize and authenticate millions of magnetic card and check transactions daily, facilitating over a trillion dollars of world-wide commerce each year.
- MagTek leads the payment industry's campaign to wipe out counterfeit card fraud by 2011, saving banks, processors, merchants and consumers billions of dollars annually, effectively eradicating an entire category of crime.

Brief Company History

MagTek is a privately held company in Seal Beach, CA. The state-of-the-art facility houses the Corporate Headquarters, Design, Engineering, Manufacturing, Sales, Marketing and Support Divisions. Additionally, MagTek has sales offices throughout the United States, Europe, and Asia, with independent distributors in over 40 countries. MagTek is the only company in the industry that does not outsource or offshore any of its key injection, design or engineering allowing us to further innovate, manage and secure our customers sensitive cardholder data and payment ecosystems as well as design and rapid prototype custom hardware.

Magensa, MagTek's fully owned subsidiary and payment protection gateway, is PCI level 1 Service Provider and is a fraud prevention, detection and advisory service. It maintains a globally accessible registry of authentication information so that consumers, financial institutions, retailers, businesses and governments can assess the validity and trustworthiness of the credentials and products they rely upon in the course of online identification, payment, and other important transactions. Additionally, Magensa provides token management and cryptographic services, vital to the protection of cardholder data, the payment system, and personal or sensitive information.

Patent information

MagnePrint® is a patented technology licensed on a reasonable basis to responsible parties who intend to protect consumers and card issuing, accepting and relying parties from fraud due to the use of counterfeit credentials. Its usage is governed by a Technology Usage Patent and License Agreement.

TRADE MARK™ AND REGISTERED MARK®

Product Name	Product Family	Description
Excella™	Check Reading	MICR Check reader and dual-sided scanner
IntelliCAT®	PIN Related	Consumer-selected PINs and issuance
IntelliCoder®	PIN Related	Manual Swipe Card Activator
IntelliPIN®	PIN Related	Encrypting PIN pad with Magnetic Stripe Reader
IntelliStripe® 320	Card Reading	Motorized Magnetic and Smart Card Reader
IntelliStripe® 65	Card Reading	Insert Magnetic and Smart Card Reader
IntelliStripe®	Card Reading	Hybrid Smart Card magstripe reader
IntelliStripe® 380	PIN Related	Desktop Motorized Reader-Encoder
IPAD®	PIN Related	PIN encrypting device MagnePrint®
MagneSafe™	Card Reading	MagnePrint technology
MagneScore™	Card Reading	MagnePrint technology
MCAT®	PIN Related	MagTek Card Activating Terminal
MICRImage™ Demo	Check Reading	Demo Program for MICRImage
MICRImage™	Check Reading	MICR Check reader and scanner
Motorized IntelliCoder®	PIN Related	Motorized Card Activator

HEADQUARTERS

MagTek is headquartered in Seal Beach, CA.

PRODUCT LINES

Secure card reader authenticators
Card Personalization Devices
PIN and POS Devices
Small Document Scanners
Transaction Security

EMPLOYEES AND LOCATIONS

Transacts business in more than 40 countries

300 employees worldwide

California based HQ and manufacturing center

Support facilities located in Minnesota, Massachusetts and California

MagTek offers additional coverage throughout the USA to cover all time zones through remote employee placement

CUSTOMERS

Leading Fortune 100 retailers and top financial institutions have MagTek products distributed throughout their organizations including at the POS, teller lines, ATMs, and front and back offices.

MagTek products are integrated by leading distributors, value added resellers, ISOs, manufacturers, product developers, engineers and gateways.

STANDARDS OF COMPLIANCE

TR-39 Visa certified key injection facility

Registered to ISO 9001:2008

Registered as a VISA/PCI ESO organization

Certified to MasterCard TQM and PCI PTS requirements for secure manufacturing of PIN entry products.

PCI PTS 3.x, SRED (search MagTek)

EMV L1 Contact

EMV L2 Contact

EMV L1 Contactless

EMV L2 Contactless (Q1 2015)

MagneSafe™ enabled devices consist of Mobile, NFC, L1 & L2 EMV, SRED and PCI PTS 3.X certified hardware.
