QWICKPAY | by **MAGENSA**
THE SAFEST WAY | A MAGTEK COMPANY

QwickPAY mobile payments Mobile Merchant Powered by Magensa

QwickPAY reduces PCI Scope

The use of MagTek SCRA and the QwickPAY Payment Protection Gateway, when properly implemented, will dramatically reduce the scope of Requirements 1, 2 and 11 and provide additional scope reduction for requirements 3, 5, 6, 7, 9, 10, and 12.

The requirements of PA-DSS are listed below.

1. Do not retain full magnetic stripe, card verification code or value (CAV2, CID, CVC2, CVV2), or PIN block data
2. Protect stored cardholder data
3. Provide secure authentication features
4. Log payment application activity
5. Develop secure payment applications
6. Protect wireless transmissions
7. Test payment applications to address vulnerabilities
8. Facilitate secure network implementation
9. Cardholder data must never be stored on a server connected to the Internet
10. Facilitate secure remote access to payment application
11. Encrypt sensitive traffic over public networks
12. Encrypt all non-console administrative access
13. Maintain instructional documentation and training programs for customers, resellers, and integrators

Accept payments, offer unattended solutions, and deliver a secure eCommerce experience

If you are a merchant who needs to offer digital transactions fast, QwickPAY is the solution for you. QwickPAY delivers secure card reading, fraud alerts, instant data protection, transaction freedom, more versatility, better stability, enhanced security, touchless and contactless transactions, and reduction of PCI scope. QwickPAY is brought to you by MagTek, an industry leader in credit card and point-of-sale (POS) peripherals.

Ready to accept in-store, curbside, call-in, or delivery

Whether you need to accept payments in-store, curbside, for delivery, or call-in takeout, QwickPAY is ready with point of sale devices that accept secure data entered over the phone with manual entry, or in-person with a swipe, tap, or dip of a card, or from tap and go mobile wallets. Streamline the payment process and create frictionless sales and invoices to facilitate in person and remote, touchless transactions with QwickPAY.

QwickPAY makes things simple, download the free QwickPAY App, onboard your merchant account, and purchase the secure card reader authenticator (SCRA) that best fits your needs and you can easily accept Visa, MasterCard, Amex, Discover, Mobile Wallets, and QwickCodes payments almost anywhere.

Streamlined security

QwickPAY's security is second to none, with instant encryption, card and device authentication, counterfeit card detection, and card tokenization, so a customer's sensitive card details never enter the mobile phone/tablet or browser. Details are sent over secure connections for decryption, authentication, and processing. SCRA's are the ONLY card readers that perform real-time counterfeit card detection. This helps to lower the scope and cost of PCI audits, saving time and money.

Administration, Reporting and Custom Receipts

QuickPAY provides the administrative tools you need for your business. It provides a complete payment processing platform, an account management system, and a virtual terminal for custom invoice and receipt creation, and complete, cross-device reporting. You can also operate QuickPAY as an unattended terminal using the kiosk mode, to speed lines, accept donations, or take quick curbside orders.

Compatibility and functionality, you need

Expand the way you do business today with the safest mobile POS solution ever. QuickPAY delivers a broad range of compatibility, allowing your browser-based, iOS, Android, and Windows devices to evolve into a highly secure payment system. QuickPAY supports a variety of transaction types including: Sales, Invoices, Voids and Refunds; and accepts a variety of transaction types including card swipe, card tap, card dip, manual entry, mobile wallet-tap, and QuickCodes tokens.

Hardware you can depend on for security and reliability

QuickPAY is a complete mobile payment solution that uses the most reliable and safest secure card reader authenticators. SCRA's connect to a wide variety of devices including smart phones and tablets via the headphone jack or Bluetooth LE technology; USB interface for connection with Windows and PCs; and Lightning connection for most iPhone and iPad devices. SCRA's are reliable, bi-directional readers that read ATM, Debit, Credit, and Gift cards and provide a smooth swipe path for excellent first swipe read rates.

MAGNETIC CARD READER (SCRA)
 3 track, bi-directional card reading
 ISO 7810, 7811 compliant cards
 Open standards-based encryption 3DES
 DUKPT Key Management
 MagnePrint® Card Authentication
 Immediate card data tokenization
 Protects card data and surpasses PCI DSS requirements

MOBILE - APPLICATION
Android 4.4 or newer COMPATIBLE SCRA
 Audio jack: uDynamo
