

MAGTEK[®]
SECURITY FROM THE INSIDE

Provide your guests a pleasant and secure getaway

MagTek hardware and Magensa Cloud Services combine to offer the payments tools necessary to create a relaxing, comfortable hospitality environment. From a front desk POS to a mobile tablet solution poolside, from contactless vending in the lobby to online spa appointments, MagTek supports the wide variety of payment methods guests prefer. And by utilizing the latest data encryption methods, tokenization, and easy-to-integrate gateway services, guests and operators enjoy a smooth, secure payment experience.

Mobile Payment Acceptance

It is vital for a successful hotel, cruise ship, and others to offer a reliable mobile payment platform. Whether paying at the table, the pool, the spa, or sundry shop, MagTek hardware and services deliver easy integration and added security. By bringing multiple low-cost, and secure point-of-service terminals directly to the guest, hospitality providers deliver trust and security, reduce wait times, enable increased convenience, and minimize overall risk of fraud, all while limiting the scope of PCI.

Digital Concierge

Limits on staffing, make offering around the clock staffing or peak check-in/check-out times challenging. But a digital concierge delivers the service guests need. MagTek has worked with leading hospitality groups over the years, developing best practices to support development of unique solutions. Our components are validated, easy-to-integrate, and have APIs and SDKs. Known for reliability and versatility, MagTek devices and Magensa Services are designed to support our partners.

Property Management System

MagTek boasts rugged countertop hardware ready for the property management system integration. These devices accept a variety of payment types including EMV, contactless, and barcodes and generate tokens on transaction. Magensa's TokenExchange can be used throughout the hospitality environment for loyalty, rewards, and payments for duration of stay, or for subsequent return visits.

ISV Solutions

ISVs recognize the unique payment solution requirements in the hospitality space. MagTek and Magensa Cloud Services supply the tools they need, with easy-to-use and well documented software developer kits (SDKs), application program interfaces (APIs), up-to-date documentation, browser-based toolboxes, support across operating systems, a fast-path to P2PE, L3 certification, and PCI compliance.

Value Added Reseller (VARs) Solutions

MagTek's experience working across channels and verticals gives us the expertise to understand the complete payment process flow. This expertise is shared with partners to support the designing and development of any hospitality environment payment solution. Our support staff helps you determine the best hardware and services to meet each environment's needs, and our US-based support across time zones deepens our ability to respond to your needs. We are core, processor, and acquirer neutral and work in most hospitality POS environments. When you work with us, you get the advantage of our complete network of ISV and ISO partnerships.

Independent Sales Organization (ISOs) Solutions

Providing the hospitality industry with the latest in quality payment solutions is tantamount to ISO's business. MagTek and Magensa Cloud Services offer quality tools and services to accomplish just that. From an array of hardware devices that share a common kernel (which requires just one certification) to our Reader Management System (which supports remote key injection and firmware updates), the tools and services ISOs can choose from are ideal for innovative payment solutions. Our dedicated account managers support you in your compliance needs to determine the best and most secure path to success.

Summary

Hospitality is a service industry. By deploying a seamless, easy-to-use and friction-free payment solution, supported across all facets of the facility, guests can pay how they want, where they are. And because of MagTek's versatile offerings, more time can be spent catering to guests than running payments. From a boutique hotel to a resort, from a mountain chalet to a cruise ship, MagTek and Magensa Cloud Services have the tools to turn a trip into a vacation.

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission, and security of cards, barcodes, checks, PINs, and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Our hardware products include secure card reader/authenticators, Quantum secure cards, token generators; EMV Contact Chip, EMV Contactless, barcode and NFC reading devices; encrypting check scanners, PIN pads, and credential personalization systems. These products all connect to Magensa, a MagTek owned gateway that offers businesses the ability to securely process transactions using authentication, encryption, tokenization, and non-static data. MagTek is headquartered in Seal Beach, CA, please visit www.magtek.com to learn more.
