**MagTek's DynaFlex II Go Boosts the Security and Versatility of  
VAULT's Mobile POS Solution, GoWork Pro**

*DynaFlex II Go's ability to facilitate and secure payment and non-payment transactions  
increases GoWork Pro's reach into growing markets*

**Seal Beach, CA, January 10, 2026** – MagTek, a global leader in secure payment technology and security solutions, and VAULT, an innovator in mPOS workflow systems, unveil the integration of MagTek's DynaFlex II Go into VAULT's GoWork Pro solution. By combining advanced transaction technology with a protective charging case, this solution satisfies the demand for reliable payments and secure non-payment workflows, such as identity management.

MagTek's DynaFlex II Go was designed to meet the latest demands of mobile payment and non-payment transactions. It supports traditional payment methods; swipe, dip and tap for cards, NFC mobile wallets and 1D/2D barcode scanning. Additionally, it supports Apple® VAS and Google SmartTap™ opening a world of possibilities with event ticketing, loyalty programs, airline tickets, and MIFARE® Classic, MIFARE® DESFire®, and NTAG® to open more doors, quite literally, by providing solutions for access control and authentication. The result is one small, rugged, and versatile device that facilitates a wide variety of transactions, including line-busting, curbside pickup, delivery services, or deployment in countertop, mobile, or semi-attended environments.

VAULT's GoWork Pro delivers the dual purpose of charging and protecting a mobile POS device. Its patented cord-free charging technology demonstrates VAULT's devotion to providing innovative and versatile products to the ever-expanding mPOS market. Built with high-quality materials and designed to exceed industry standards, the protective case shields devices from scratches, drops, and other everyday hazards, ensuring peace of mind for users. And because it is compatible with all Apple USB-C devices, GoWork Pro with DynaFlex II Go is ideal for use in healthcare, retail, restaurant, manufacturing, banking and more.

"We built DynaFlex II Go to specifically target the growing mobile demand for payment and non-payment transactions alike," said Andy Deignan, President and CEO of MagTek. "DynaFlex II Go was built to bridge the gap between payment processing and access control in a mobile world. To truly unlock that potential in the field, our customers needed an enclosure that offered zero compromise on protection. VAULT didn't just meet that requirement; they set the standard."

\*\*\* FOR IMMEDIATE RELEASE \*\*\*

“Our goal is to support and protect devices across industries,” said Kevin Kuluvar, VP Enterprise Revenue & Business Development, at VAULT. “With DynaFlex II Go supporting both payment and non-payment transactions, VAULT’s GoWork Pro supports and protects a wider swath of industries, bringing our robust solutions to growing markets.”

As markets evolve and new business demands arise, MagTek and VAULT strive to provide the tools and services necessary to meet these demands. The dynamic combination of DynaFlex II Go and GoWork Pro meets the burgeoning requirements of industries intent on growing their businesses with a flexible and multi-use mobile payment, access control, and authentication solution.

### **About MagTek**

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission, and security of cards, barcodes, checks, PINs, and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Our hardware products include secure card reader/authenticators, Quantum secure cards, token generators; EMV Contact Chip, EMV Contactless, barcode and NFC reading devices; encrypting check scanners, PIN pads, and credential personalization systems. These products all connect to Magensa, a MagTek owned gateway that offers businesses the ability to securely process transactions using authentication, encryption, tokenization, and non-static data. At MagTek, we don’t outsource security. Our USA-based headquarters in Seal Beach, CA house our engineering, key injection, device management, production, sales, quality, and final assembly departments. Please visit [www.magtek.com](http://www.magtek.com) to learn more.

### **About VAULT**

VAULT is proudly under the Pioneer Square Brands umbrella, along with Brenthaven and Gumdrop. VAULT helps companies solve problems and run more efficiently. We offer affordable solutions that improve customer experience across industries.

Our solutions include cable-free charging, mobile point of sale, rugged case protection and more. Our cable-free charging and mPOS solutions are currently used in healthcare, retail, manufacturing, hospitality, and various other industries.
