## **MagTek® and OtterBox® Expand Mobile Payment Solution Offerings with Compatibility to the uniVERSE Case System**

*MagTek adds DynaFlex II Go, the latest mobile device, to the inventory of uniVERSE mobile accessories*

Seal Beach, CA – January 11, 2025 – MagTek, a global leader in secure payment technology and security solutions, and OtterBox, an established purveyor of durable, innovative phone and tablet cases, combine resources to bring a line of adaptor accessories to market. These adaptors have integrated the unique slotted rail design of OtterBox uniVERSE cases and are form fitted to each MagTek mobile payment device, providing businesses with a variety of mobile payment solutions tailored to their needs.

The OtterBox uniVERSE Case System offers versatile designs for a range of devices, including phones and tablets from Google, Samsung and Apple. Its innovative slotted rail system allows users to seamlessly swap accessories, such as POS card readers, batteries, and scanners, without removing the case. Designed to enhance mobile devices for use as point-of-sale systems, access control platforms, authentication devices, and more, uniVERSE products combine versatility and durability. With shock-absorbing ribbing, a hard polycarbonate exterior, and a rubberized raised beveled edge, these cases perform exceptionally in both sleek retail environments and rugged industrial settings.

MagTek complements the uniVERSE Case System with a line of adapter accessories for its mobile payment devices, including the iDynamo 5 (Gen II), iDynamo 6, tDynamo, DynaProx, and the latest addition, DynaFlex II Go. DynaFlex II Go supports tap, dip, swipe, and scan transactions and offers robust security through AES-256 encryption and CMAC authentication. Beyond payments, it also supports non-payment NFC data, such as MIFARE® Classic, MIFARE® DESFire®, and NTAG® for access and authentication. Paired with the uniVERSE Clip, DynaFlex II Go delivers a sleek, mobile form factor that integrates seamlessly into both new and existing systems.

"Understanding customer needs and delivering reliable solutions has always been a pillar of MagTek's strength," said Andy Deignan, Chief Executive Officer of MagTek. "Our collaboration with OtterBox has been highly rewarding, providing immense value to our mutual customers. By integrating the innovative security features of MagTek devices with OtterBox's durable and versatile cases, we've developed exceptional solutions tailored to a wide range of industries and use cases. This partnership has been an outstanding experience, resulting in versatile, customer-focused offerings that meet diverse needs."

The combined solutions from MagTek and OtterBox excel in industries such as retail, healthcare, hospitality, airlines, and finance. Their mobility supports line-busting, curbside pickup, and delivery scenarios, while deployment options include countertop, mobile, unattended, and semi-attended environments. The uniVERSE Clip connects MagTek's mobile payment devices effortlessly to OtterBox uniVERSE Cases via the innovative rail system, creating a robust mPOS solution. Together, MagTek and OtterBox deliver a secure, versatile, and easy-to-deploy solution that supports a wide variety of payment methods while providing superior data security and device protection.
