MagTek's Magensa Payment Protection Gateway Delivers Secure Processing for GrabScanGo's Zero-Provisioning, Multi-Path Self-Checkout Platform

GrabScanGo has launched a patented plug-and-play zero-provisioning technology that delivers an expedited and seamless payment experience

Seal Beach, CA, January 11, 2026 - MagTek, a global leader in secure payment technology and security solutions, Magensa, a MagTek subsidiary offering secure payment gateway services for card-present and card-not-present transactions, and GrabScanGo, a provider of plug-and-play self-checkout platforms for unattended and hybrid retail environments, announce the addition of zero-provisioning technology to the enterprise-grade payment backbone that uses the Magensa Payment Protection Gateway (MPPG), enabling frictionless deployment, consistent payments, and shopper choice across checkout experiences.

Retail environments face peak moments - shift changes, event breaks, hotel rushes, and busy lobbies - when lines and bottlenecks quickly form. GrabScanGo's platform eliminates these constraints by allowing shoppers to choose the checkout method that works best for them, at that moment:

- Self-checkout terminals for traditional, shared checkout using MagTek DynaFlex hardware
- Instant App Clip checkout using Apple Pay (wallet) - no app install required
- Full mobile app checkout for repeat or power users using card-on-file, Apple Pay, or Google Pay

All three checkout methods operate simultaneously within the same market, allowing shoppers to naturally distribute themselves across available paths, reducing wait times and keeping traffic moving, even during peak demand.

"MagTek is excited to partner with GrabScanGo once again to redefine the self-checkout experience," said John Arato, Chief Sales Officer at MagTek. "Together, we're enabling secure, flexible, and consumer-friendly payments across terminals, mobile experiences, and instant checkout paths. When partners leverage the full potential of the Magensa Gateway's robust technology stack, their business often scales faster and at higher rates."

FOR IMMEDIATE RELEASE

The Magensa Gateway secures, tokenizes, and processes the transactions from MagTek hardware, through the App clip, or via the mobile app, regardless of how the shopper chooses to check out. This happens through one portal, providing a single, enterprise-grade payment backbone. MPPG accepts card-present and card-not-present transactions, whether customers want to pay with their EMV Chip card, mobile wallet application, or scan QR Codes, Magensa delivers traditional and alternative payments to the necessary endpoints.

MagTek DynaFlex hardware allows for tap, insert, or swipe of a credit or debit card, tap from a customer's phone wallet, or a scan a QR code. This flexibility is especially valuable in unattended and high-traffic retail environments where speed, uptime, and payment choice are critical. DynaFlex is a secure card reader authenticator using strong encryption, authentication, and tokenization.

"Our goal is to remove friction everywhere it exists - at checkout, at payment, and behind the scenes," said Wilfred Martis, Co-Founder and CEO of GrabScanGo. "Our patented plug-and-play platform makes that possible, and MagTek's DynaFlex readers and Magensa Gateway give us the secure, flexible payment foundation to support every way shoppers want to check out or pay."

For more information regarding MagTek Hardware and the Magensa Gateway please contact MagTek at 562-546-6400, visit www.magtek.com, or email retailsolutions@magtek.com. Or if you are headed to the NRF Show, NYC, NY, Jacob Javits Convention Center, Jan 11-13, 2026, attendees can experience GrabScanGo's plug-and-play self-checkout platform and MagTek-powered payment flows live at Booth #6165. For more information about GrabScanGo's plug-and-play self-checkout platform, visit <https://grabscango.com/>.

About MagTek

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission, and security of cards, barcodes, checks, PINs, and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Our hardware products include secure card reader/authenticators, Qwantum secure cards, token generators; EMV Contact Chip, EMV Contactless, barcode and NFC reading devices; encrypting check scanners, PIN pads, and credential personalization systems. These products all connect to Magensa, a MagTek owned gateway that offers businesses the ability to securely process transactions using authentication, encryption, tokenization, and non-static data. At MagTek, we don't outsource security. Our USA-based headquarters in Seal Beach, CA house our engineering, key injection, device management, production, sales, quality, and final assembly departments. Please visit www.magtek.com to learn more.
