**MagTek's DynaFlex II Go is Integrated into
InVue's Portable Payment Center**

*InVue Releases a Battery Powered Portable Payment Center
that Requires No External Power Source*

Seal Beach, CA, January 11, 2026 - MagTek, Inc., a global leader in secure payment technology and security solutions, has collaborated with InVue, a leader in Smart Access technology and point-of-sale hardware solutions that help retailers streamline checkout, enhance customer access, and improve store operations, to deliver a best-in-class, battery-powered point-of-sale terminal featuring seamless integration with the MagTek DynaFlex II Go.

DynaFlex II Go is a secure Dyna Device with tap, dip, swipe, and scan technology. It accepts payments via magnetic stripe, EMV Contact Chip, EMV Contactless, and NFC Contactless through mobile wallets; and non-payment with MIFARE, MIFARE DESFire, and NTAG technologies. Built for security, DynaFlex II Go (PCI PTS 6.x, SRED) offers MagTek's Common EMV Kernel, the most powerful encryption including AES 256, tokenization, and authentication; is L3 certified with the Magensa Gateway; and connects with the MagTek Reader Management System for automated updates.

"We chose to integrate MagTek hardware because we know it is reliable," said Sean Kilbride, Senior Product Manager of InVue. "It also has a sleek form factor that doesn't use a lot of power, so it is perfect for a counter-to-mobile battery-operated POS solution."

InVue's Portable Payment Center supports any USB-C PD Tablet (case required: available cases iPad (10, 11 gen, 10.9"); iPad mini (6, 7 gen)) and supports the integrated MagTek DynaFlex II Go payment peripheral. Devices stay charged on the stand with battery, can be plugged in using battery as backup, and can use an external battery power pack. It uses a weighted free-standing base with no external cables, and the tablet and peripheral are removable without the use of tools. The InVue Portable Payment Center Pro Stand supports any USB-C PD tablet or other USB-C charge/data peripheral as secondary customer facing display (HID) option with optional payment-case required.

"We were really excited when InVue presented their new terminal enclosure as it addresses several mobile and countertop use cases. Our customers are going to be very impressed with this product." said John Arato, Chief Sales Officer of MagTek. "The

FOR IMMEDIATE RELEASE

DynaFlex II Go was made for mobility and by integrating it into a free-standing POS workstation without any wires, it makes it extremely flexible".

Target markets are hospitality: restaurants, bars, Night Clubs, Gaming, Live Events; retail: pop up events, fitting rooms, mobile carts; and anywhere a customer can benefit from having a POS terminal/ satellite register available. DynaFlex II Go can be easily removed from the center and still be connected to the payment host for table-side payments or where access is limited.

The Portable Payment Center is available now through InVue, resellers, and channel partners.

For more information regarding DynaFlex II Go please contact MagTek at 562-546-6400, visit www.magtek.com, or email retailsolutions@magtek.com. For more information regarding the InVue Portable Payment Center, call 1-888-55-INVUE, visit www.invue.com. Or visit their respective representatives at the NRF Show, NYC, NY, Jacob Javits Convention Center, MagTek at Booth #6165, InVue at Booth #2421, and Direct Source Booth #6039 Jan 11 – 13, 2026.

About MagTek

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission, and security of cards, barcodes, checks, PINs, and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Our hardware products include secure card reader/authenticators, Qwantum secure cards, token generators; EMV Contact Chip, EMV Contactless, barcode and NFC reading devices; encrypting check scanners, PIN pads, and credential personalization systems. These products all connect to Magensa, a MagTek owned gateway that offers businesses the ability to securely process transactions using authentication, encryption, tokenization, and non-static data. At MagTek, we don't outsource security. Our USA-based headquarters in Seal Beach, CA house our engineering, key injection, device management, production, sales, quality, and final assembly departments. Please visit www.magtek.com to learn more.
