**KwickPOS Expands its Omni-Channel POS Ecosystem Through Integration with the Latest MagTek Hardware and Magensa Cloud Services**

*Restaurants, Food Trucks, and Busy Retail Environments Will Benefit from More Ways to Accept Payment Including Mobile Wallets and Contactless Cards*

Seal Beach, CA, March 27, 2025 – MagTek, a global leader in secure payment technology and security solutions, and KwickPOS, a restaurant management POS system provider, announce successful integrations with MagTek’s newest secure card reader authenticator, DynaFlex II Go, and Magensa’s TokenExchange Connect, to streamline payment hardware, improve operations, and enhance the consumer’s payment experience.

DynaFlex II Go, PCI PTS SCR 6.x SRED, delivers tap, dip, swipe, and scan capability with NFC contactless (Apple Pay<sup>®</sup>, Google Pay<sup>SM</sup>), EMV contactless, EMV Contact Chip, magnetic stripe, and barcode reading (QR Codes, linear barcode, Aztec, etc.). DynaFlex II Go works across Android, iOS, and Windows operating systems and connects through USB HID, USB iAP2, or Bluetooth LE. DynaFlex II Go comes in a small form factor, making it easier to integrate into mobile, counter, and stand-alone solutions.

“The tDynamo (Gen II) has been a game-changer for our mobile solutions, and the DynaFlex II Go elevates this further with expanded capabilities and seamless integration,” said Ming Ye, COO of KwickPOS. “As online sales continue to grow rapidly, integrating Magensa TokenExchange Connect and its advanced eCommerce features, including user-friendly iFrames, strengthens our offering and helps us stay ahead in the industry.”

Magensa provides an extensive set of robust gateway solutions that seamlessly unify card-present and card-not-present transactions, securely delivering the data to designated endpoints. TokenExchange Connect, an eCommerce iFrame service, accelerates developers' ability to facilitate secure online transactions while simplifying complex security requirements. The Magensa Gateway services expand the convenience and diversity of in-person payment options to online and in-app environments. Supported payment methods include PayPal<sup>®</sup>, Venmo<sup>®</sup>, digital wallets such as Apple Pay<sup>®</sup> and Google Pay<sup>TM</sup>, as well as Apple VAS<sup>®</sup> and Google<sup>TM</sup> SmartTap platforms.

KwickPOS offers a comprehensive browser-based Omni-Channel POS platform. The POS terminal, online ordering, back office, inventory, marketing tools, and enterprise management are housed in one system. This increases the flexibility between selected host devices, enclosures, and platforms. The application enables pay-at-the-table, line-busting, and central counter transactions perfect for restaurants, food trucks and busy retail environments.

“The successful integration of DynaFlex II Go and Magensa’s TokenExchange Connect delivers an innovative leap forward in secure and streamlined payment acceptance,” said Andy Deignan, CEO of MagTek. “Together, we’re enabling merchants to effortlessly manage transactions, safeguard sensitive customer data, and confidently operate in today’s dynamic marketplace.”

The full KwickPOS solution is available now and includes the DynaFlex II Go, tablet with enclosure, and the KwickPOS application. For more information on the DynaFlex II Go, contact [retail.solutions@magtek.com](mailto:retail.solutions@magtek.com), call 562-546-6400, or go to [www.magtek.com](http://www.magtek.com).
