KwickPOS Selects MagTek and Magensa for Secure Mobile POS Payment and Gateway Services

KwickPOS delivers the KwickPOS handheld point of sale system complete with MagTek's tDynamo (Gen II) secure card reader authenticator.

Seal Beach, CA, May 16, 2024 – MagTek, a global leader in payment technology and security solutions, and KwickPOS, a restaurant management POS system provider, are announcing the collaboration of their technologies to deliver a handheld point-of-sale system to restaurants using Magensa Gateway Services and MagTek's tDynamo (Gen II) mobile secure card reader authenticator.

tDynamo (Gen II) is L3 certified with the Magensa Gateway for faster integration, offers Apple VAS platform support, and is ready to accept magnetic stripe cards, EMV Contactless, EMV Contact Chip, NFC contactless, and mobile wallet transactions (including Apple Pay and Google Pay) for line-busting and pay-at-the-table ecosystems. tDynamo (Gen II) has an OtterBox uniVERSE adaptor, that makes it easier than ever to attach to a mobile device. Because it can connect via Bluetooth LE or USB HID, tDynamo (Gen II) is compatible with iOS, Android, and Windows when used wirelessly. However, when connected via USB HID, it's compatible with Windows and Android only. This versatility makes it an excellent addition to KwickPOS's handheld solution.

“The ability to offer our customers more ways to pay in a small handheld device expands our target audience,” said Ming Ye, COO, of KwickPOS. “The great thing about integrating with the tDynamo (Gen II) and using Magensa Services is, it allows us to easily swap out and grow with MagTek hardware and expand our offering.”

tDynamo (Gen II) uses triple DEA encryption with DUKPT key management to secure transaction data. Built with the foundation of the MagneSafe Security Architecture leveraging encryption, authentication, and tokenization, transactions are securely sent through the Magensa Gateway to a wide array of leading payment processors while helping to reduce a merchant's PCI scope.

The Magensa Payment Protection Gateway service streamlines the development process, providing a robust and secure payment solution. By leveraging Magensa's L3 EMV certifications and device integration tools, KwickPOS supercharges their payments capabilities for card present, mobile, and e-commerce. The modular services provide developers with added flexibility to support Apple Pay and Google Pay for in-app and in-web, payment links, QR codes, PayPal, Venmo, and a variety of tokenization options including payment tokens and CardID tokens. Above all, merchants will be up and running faster with easy-to-integrate tools and excellent support services.

Andy Deignan, CEO of MagTek, enthusiastically endorsed KwickPOS's selection of MagTek and the tDynamo (Gen II) for their comprehensive restaurant solution. He highlighted the benefits, stating, "Coupling the reader with our Magensa Gateway Services will greatly enhance flexibility for connecting to leading payment processors and simplifying the integration of MagTek hardware." Deignan further emphasized, "By offering accessories like the OtterBox uniVERSE adaptor, connecting the reader to an iPad, iPhone, or Android device is simplified without sacrificing ruggedness and ease of use."

The KwickPOS application is built for ordering and pay-at-the-table, ideal for busy restaurants and ensures a seamless dining experience. Servers equipped with the device are enabled to process payments directly at the table, improving customer satisfaction and operational efficiency. The KwickPOS handheld device provides multiple options for delivering receipts to customers. Merchants can choose to email or text digital receipts directly to customers for convenience or route to a receipt printer for a physical copy.

The full KwickPOS solution is available now and includes the tDynamo (Gen II), iPad device, OtterBox Adaptor, and KwickPOS application. For more information on the tDynamo (Gen II) contact retail.solutions@magtek.com, call 562-546-6400, or go to www.magtek.com. For more information on the KwickPOS solution, contact sales@kwickpos.com, go to www.kwickpos.com or visit their booth at National Restaurant Association Show (Booth #6373), May 18 - 21, 2024 at McCormick Place in Chicago, IL.

About MagTek

Founded in 1972, MagTek is a leading manufacturer of electronic systems for the reliable issuance, reading, transmission, and security of cards, barcodes, checks, PINs, and identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability.
