MagTek Introduces iDynamo 6, a Highly Versatile, Mobile Secure Card Reader Authenticator

Magnetic Stripe, EMV Chip/Contactless Cards and NFC Payments are Accepted and Secured with MagTek's Innovative iDynamo 6

Seal Beach, CA, July 25, 2019 – MagTek, Inc., the world's leading supplier of retail payments security technology, announces the release of iDynamo 6, the latest Secure Card Reader Authenticator built to work with iOS, Android, and Windows Operating Systems. Understanding the demand for flexible payment devices, iDynamo 6 is a reader that is not just secure, but satisfies the requirements of ISVs, VARs, and Resellers for a single device that can work across platforms.

With the growing need to accept multiple payment options, including magnetic stripe cards, contact and contactless chip cards, and NFC payments, iDynamo 6 is designed to securely accomplish these transactions in a flexible, sturdy form factor. Additionally, with the proliferation of iOS and Android-based payment solutions, MagTek's iDynamo 6 is built to fit snugly and firmly with a wide variety of mobile phones and tablets.

"As the mobile landscape broadens and opportunities to accept payments increases, solution providers need a card reader they can easily integrate into their applications," says John Arato, MagTek's Vice President and General Manager of Retail Solutions. "iDynamo 6 is designed to satisfy that requirement, with affordability, flexibility and security."

Delivering maximum flexibility in the smallest form factor, iDynamo 6 offers an optional battery pack in addition to its universal mounting system which uses a stabilizing bracket design that attaches to the host device. iDynamo 6 is compatible with multiple operating systems and offers four separate connection options including Lightning, USB Type C (male), USB Type C (female), and micro USB. Add to this the security of the MagneSafe[®] Security Architecture and iDynamo 6 is a highly functional, secure device.

To learn more about MagTek's iDynamo 6, visit www.magtek.com or stop by Booth #232 at RetailNow 2019, July 28th - July 31st, at the Henry B. Gonzalez Convention Center, in San Antonio, Texas 78205, USA.

About MagTek

Since 1972, MagTek has been a leading manufacturer of electronic devices and systems for the reliable issuance, reading, transmission and security of cards, checks, PINs and other identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Its products include secure card readers, check scanners, PIN pads and distributed credential issuing systems. These products are used worldwide by financial institutions, retailers, hotels, law enforcement agencies and other organizations to provide secure and efficient electronic payment and identification transactions.

Today, MagTek continues to innovate with the development of a new generation of security centric products secured by MagneSafe®. By leveraging strong encryption, secure tokenization, real time authentication and dynamic payment card data, MagneSafe products enable users to assess and validate the trustworthiness of credentials used for online identification, payment processing, and other high-value electronic transactions.

MagTek is based in Seal Beach, California and has sales offices throughout the United States, Europe, and Asia, with independent distributors in over 40 countries. For more information, please visit www.magtek.com.
